

Optical fiber network distributors (Gf-NVt)

with single fiber and multi-fiber

management system

Gf-NVt : Optical fiber network distributors in street cabinet (size L)

The Gf-NVt is an overground, passive outdoor distribution point, in which optical fibers are branched, connected and distributed via a modular optical fiber management system. The cabinet is set up on a plinth, which is also used for neat insertion of outdoor cables/microducts/microduct bundles.

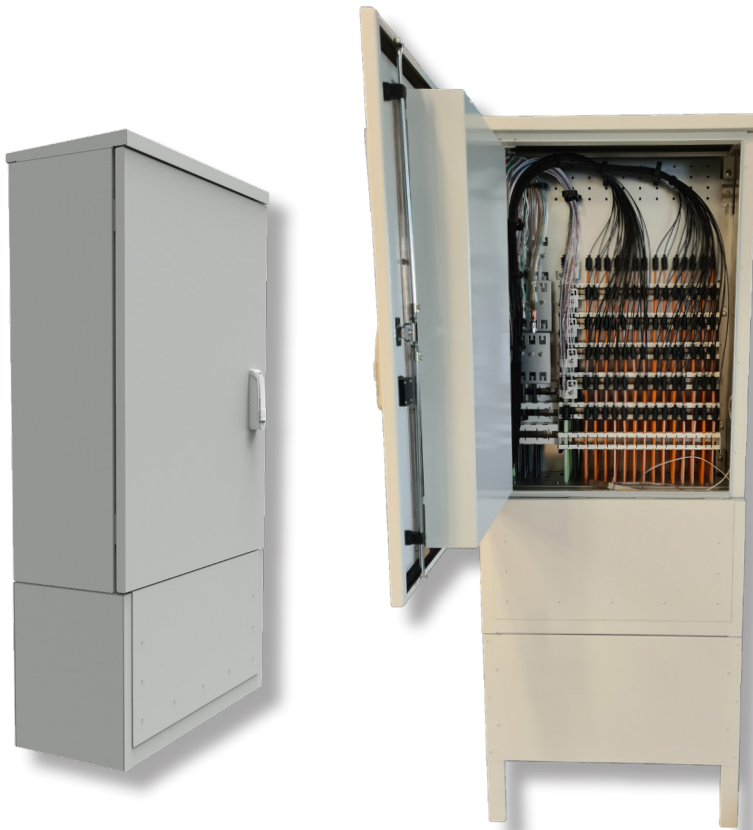

Fiber Management

Mounting plate

Space fiber management

Cabinet

Plinth

The cabinet (housing) consists of a cabinet upper housing part that can be opened with a door or a hood.

The lower housing base has a front plate or a flap that can be removed from the front.

The plinth base is the part installed in the ground on which the cabinet is mounted (plinth interface).
